

# RETICLES FC-MIL · FC-MOA

First Focal Plane

**Available in:**  
NX8 1-8x24 F1

## NIGHTFORCE®

Exceptionally fast and precise  
Daylight visible illumination

Red indicates illuminated portion of reticle

### Applications:

Close Quarters Engagement | Competition  
Hunting | General Shooting

# RETICLES

Designed to meet the needs of today's discriminating carbine shooter.

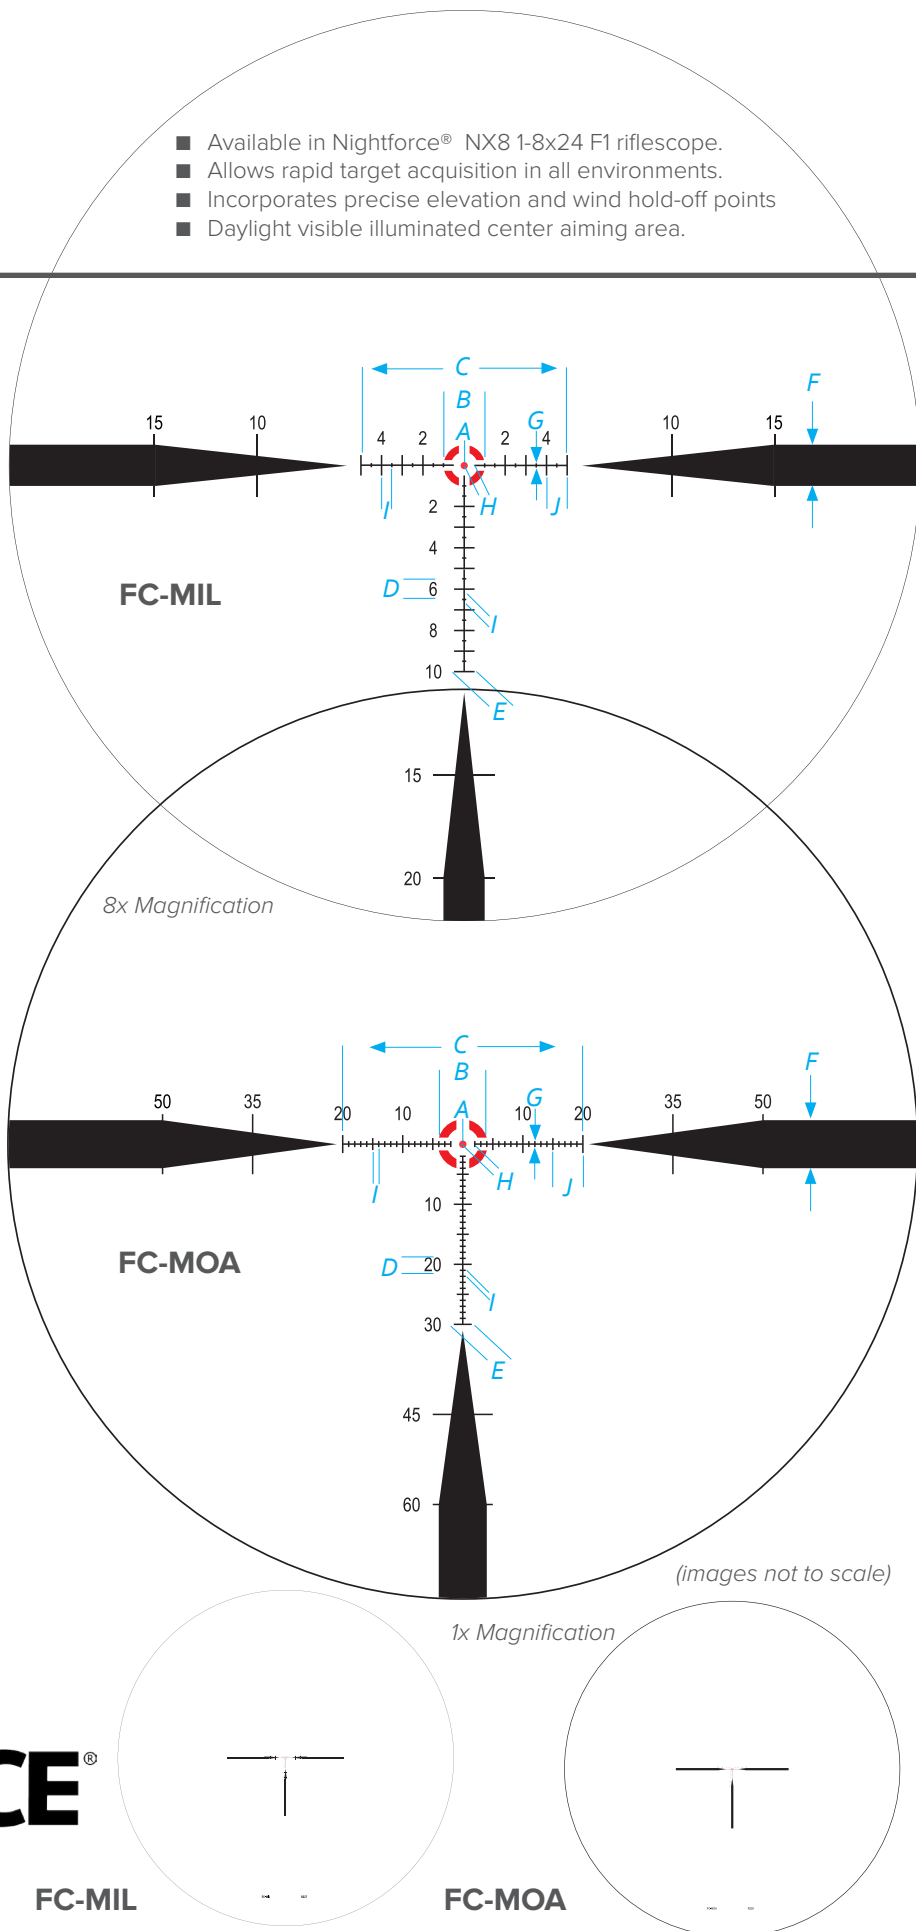

Created and optimized for low-power variable riflescopes. As first focal plane reticles, elevation and windage markings are valid at every magnification setting, providing precise hold and reference points. At low power, the bright daylight center dot and segmented circle are visible under the harshest light, allowing fast, accurate target acquisition.

At higher magnification, the clean 1 Minute of Angle (MOA) markings of the FC-MOA and .5 and 1 Mil-Radian markings of the FC-MIL provide easy hold points for moving targets, wind and elevation hold-offs, or for reference. Bold, pointed lines at 3, 6 and 9 o'clock help draw the eye to the center at any magnification.

Designed for the incredibly versatile NX8 1-8x24 F1 rifle scope, these reticles are perfectly suited for most any shooting application including close quarters, hunting, competition, and general shooting.

Available in NX8 1-8x24 F1 riflescopes.

- Available in Nightforce® NX8 1-8x24 F1 rifle scope.
- Allows rapid target acquisition in all environments.
- Incorporates precise elevation and wind hold-off points
- Daylight visible illuminated center aiming area.

## Reticle Subtensions

	FC-MIL (Mil-Rad)	FC-MOA (MOA)
A	0.35	1.25
